#### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

| Sprint   | Functional Requirement (Epic) | User Story Number | User Story / Task   | Story Points | Priority | Team Members |
|----------|-------------------------------|-------------------|---|--------------|----------|--------------|
| Sprint-1 | Registration                  | USN-1             | As a user, I can register for the application by entering my email, password, and confirming my password. | 2            | High     |              |
| Sprint-1 |                               | USN-2             | As a user, I will receive confirmation email once I have registered for the application                   | 1            | High     |              |
| Sprint-1 |                               | USN-3             | As a user, I can register for the application through Gmail   | 2            | Medium   |              |
| Sprint-1 | Login                         | USN-4             | As a user, I can log into the application by entering email   | 1            | High     |              |
|          | Dashboard                     | USN-5             | As a user/patient I can request for Organ/Blood Donation .  | 2            | Medium   |              |
|          |                               | USN-6             | As a user/donor I can view my appointments  | 1            | High     |              |

### Velocity:

++Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

### Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
